01

- ✏️ **Student writes:** group of people 1
- ✏️ **Student writes:** what they need

02

- ✏️ **Student writes:** group of people 2
- ✏️ **Student writes:** what they need

03

- ✏️ **Student writes:** group of people 3
- ✏️ **Student writes:** what they need

04

- ✏️ **Student writes:** group of people 4
- ✏️ **Student writes:** what they need

OUR SOLUTION الحل

Choose. Fill. Order.

1

Choose

A restaurant. Search by name or pick a food type.

→

2

Fill

Your cart from one menu. ➖ / ➕ stop at what is in stock.

→

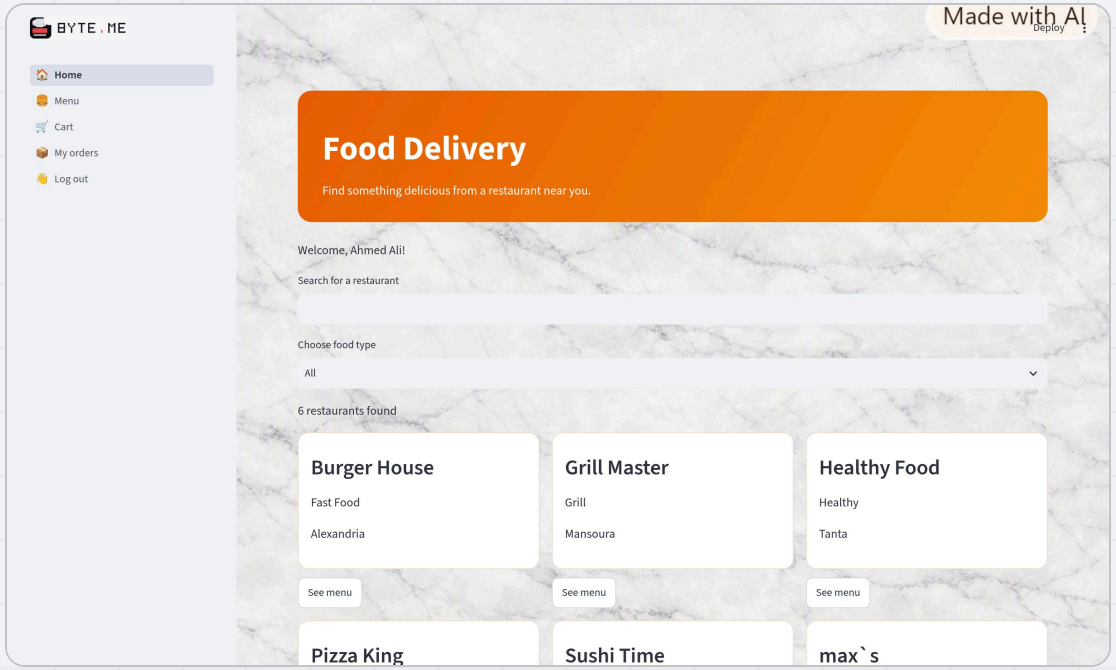

3

Order

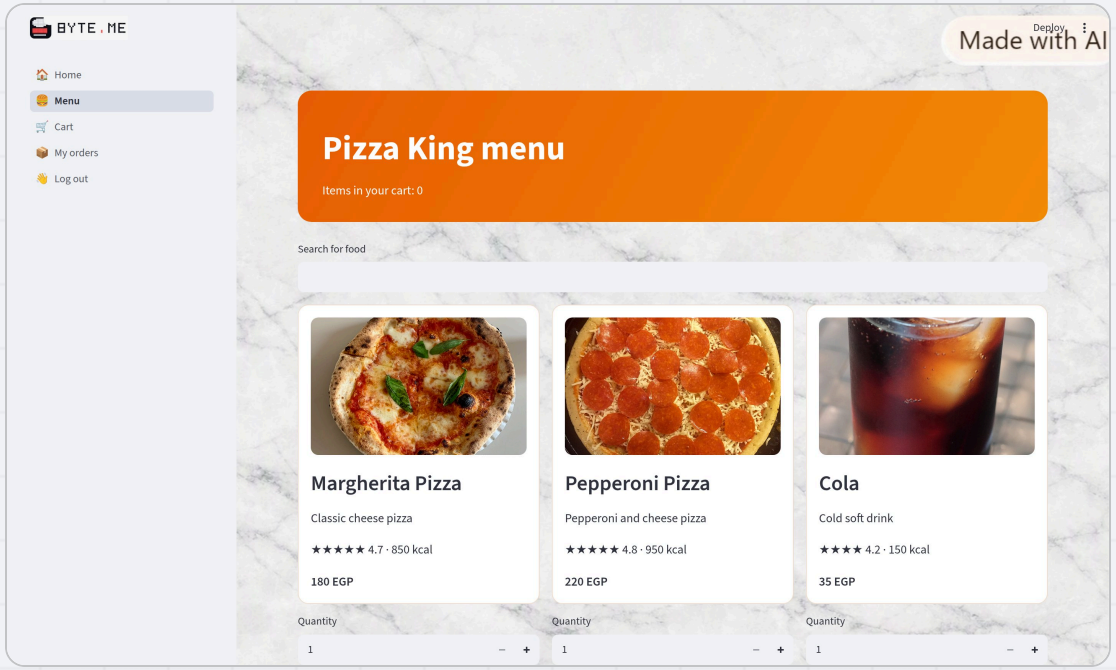

Address, notes, and cash, card or wallet. Then follow it on “My orders”.

02 · DEMO عرض

Find something to eat.

Home: every restaurant, with search and a food-type filter.

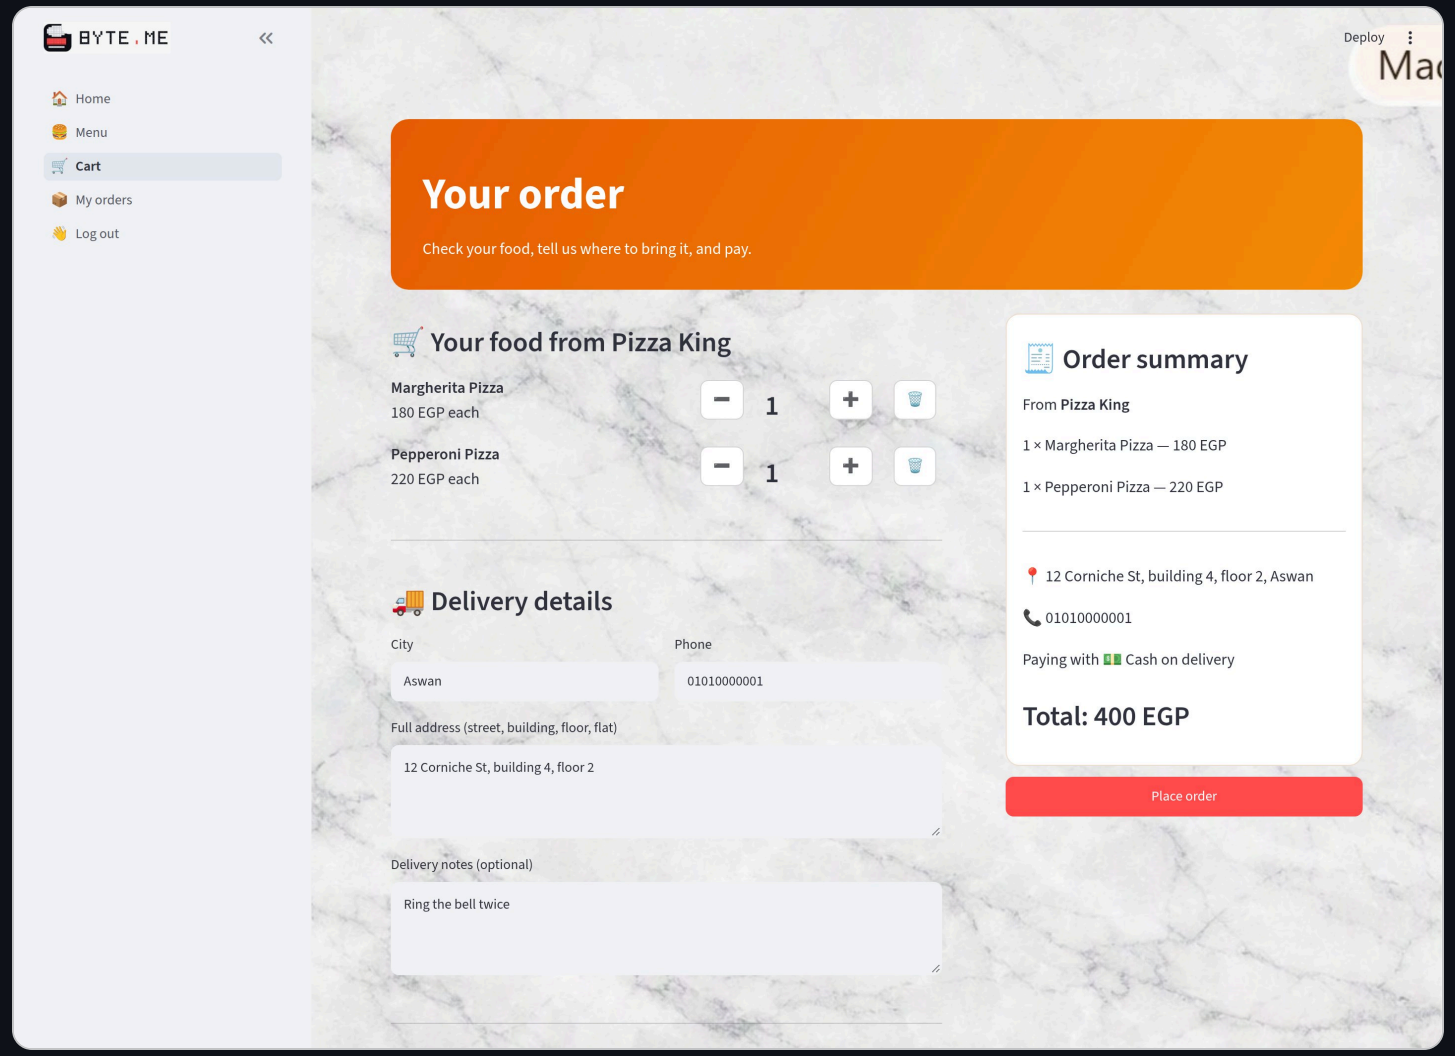

Menu: each dish with its photo, rating, calories and price.

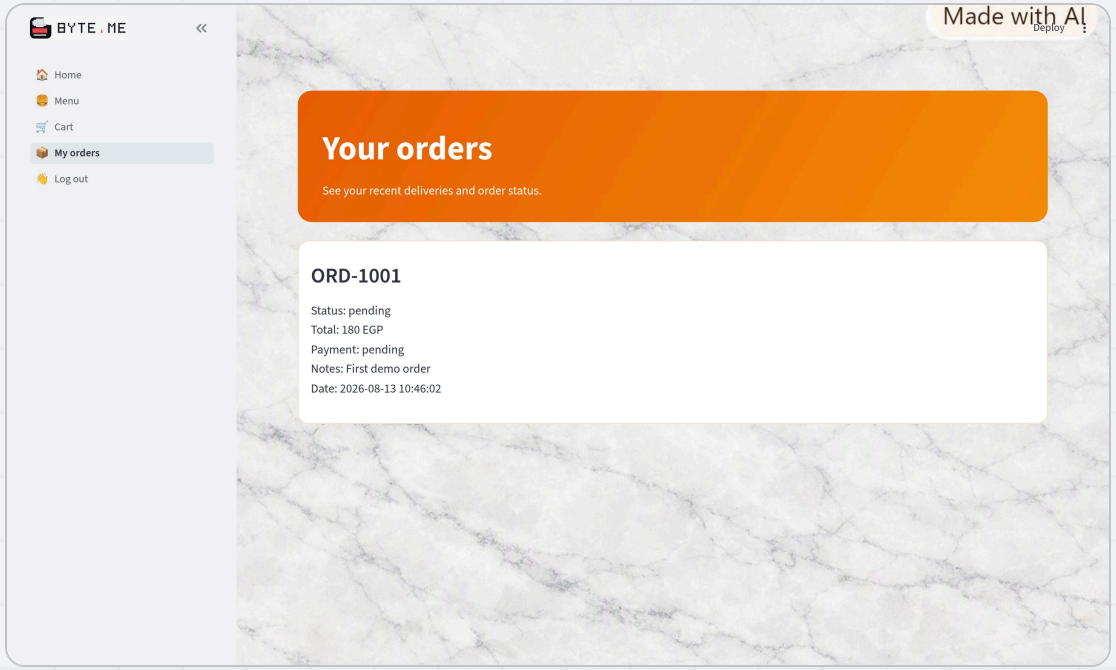

02 · DEMO عرض

Check out on one page.

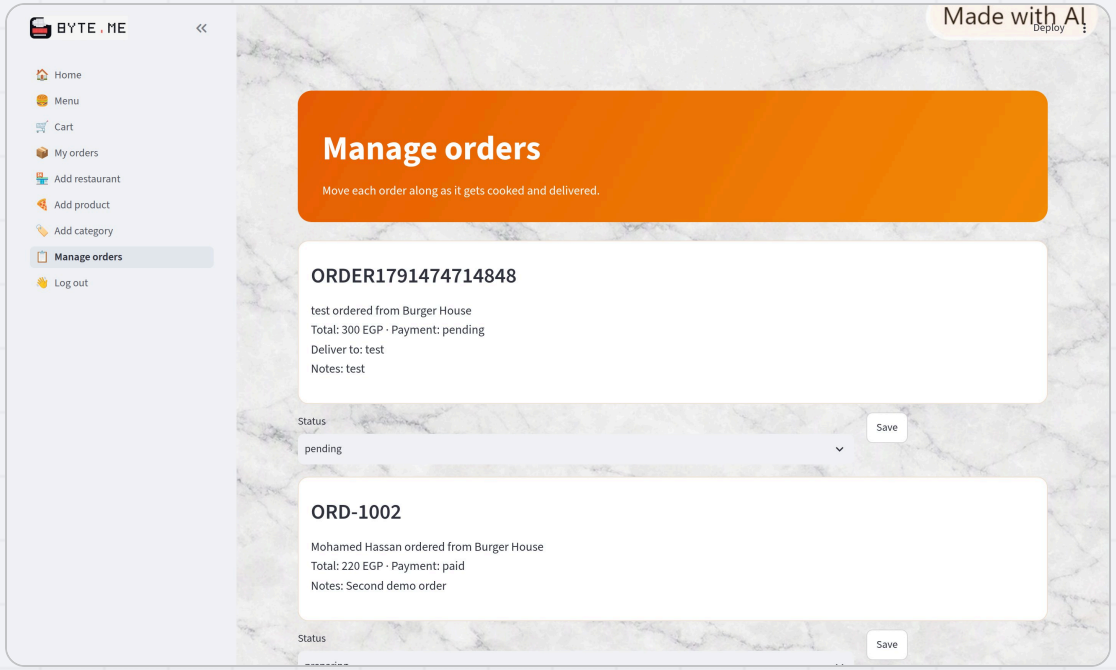

- **Change amounts**
  ➖ / ➕ for each dish, never above the stock.
- **Say where to bring it**
  City, full address, phone and delivery notes.
- **Pick how to pay**
  Cash on delivery, card, or mobile wallet.
- **See the total**
  The summary adds it all up before you order.

Follow the order.

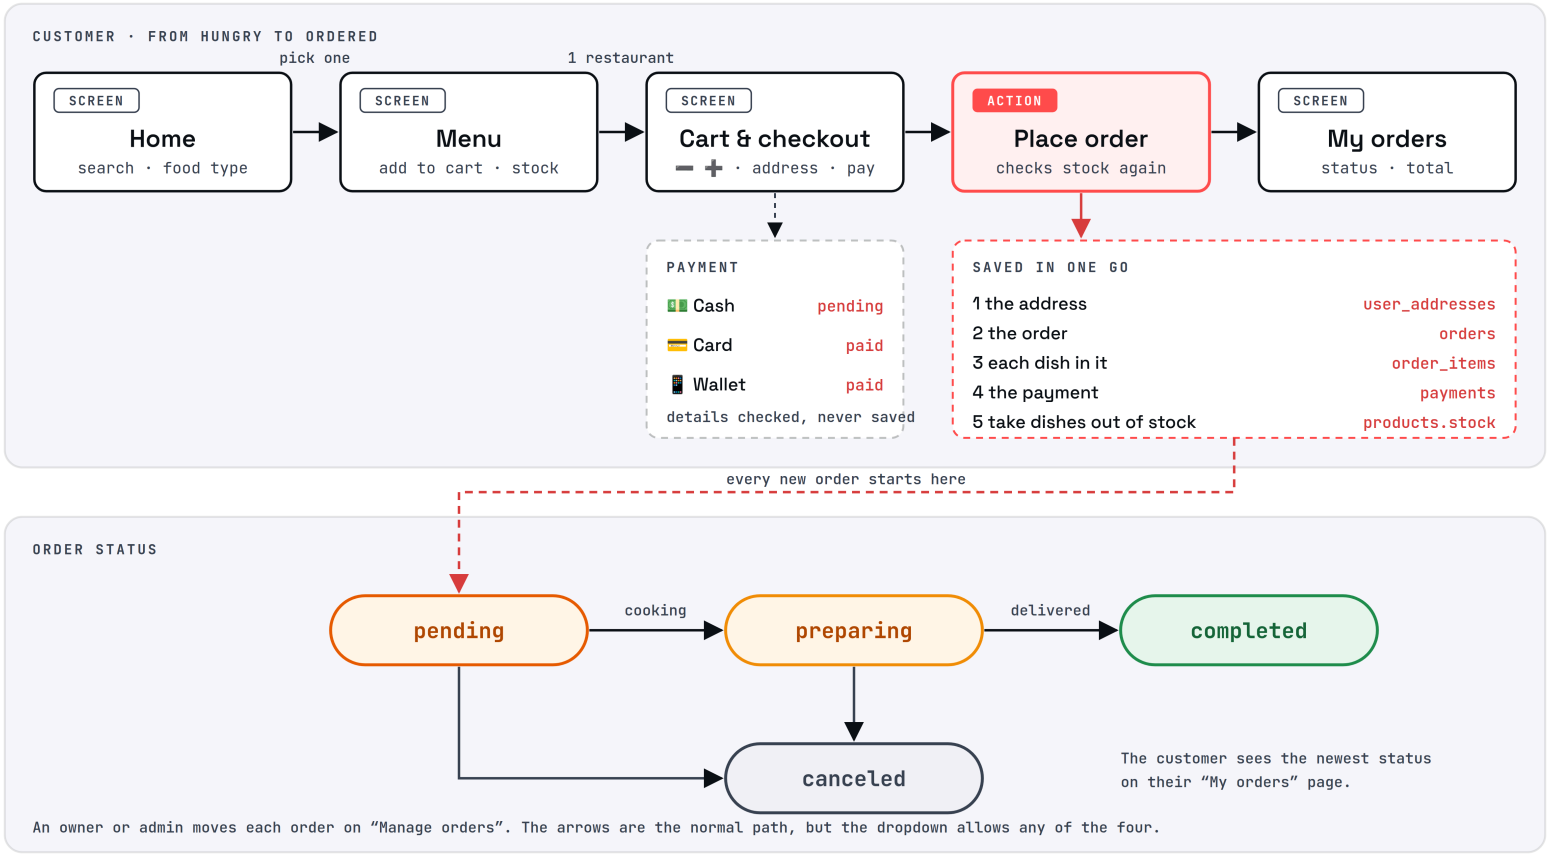

My orders: the customer sees the status, total and notes.

Manage orders: an owner or admin moves it from pending to completed.

One click, five saves.

5 rows saved when you press "Place order"

2 stock checks: in the cart, and again at checkout

4 order steps: pending, preparing, completed, canceled

Built so a beginner can read every line.

HOW THE MENU IS BUILT

EVERY RERUN

app.py runs first

Before any screen, every single time.

SESSION

Who is logged in?

st.session_state.user
None, or {"id", "name", "role"}

ST.NAVIGATION

Only allowed pages go in

A page that is not in the list cannot be opened at all.

> Hide what you can't use, instead of showing it and saying no. So the screens never check permissions themselves.

1 library to install: Streamlit

0 classes: plain variables, ifs and loops

12 Python files, one per screen

8 SQLite tables, from users to payments

Python + Streamlit for the website · SQLite for restaurants, dishes, orders and payments · plain SQL in each screen.

WHY THE NAME سر الاسم

BYTE.ME

✏️ **Student writes:** 2–4 sentences: why “BYTE.ME”? What does the logo show, and what does the name have to do with food and computers?

Thank you.

✏️ **Student writes:** your name · team or school

✏️ **Student writes:** event name and year · your email

Scan to try the live app:
byte-me.streamlit.app

A school demo: no real payments, and card details are never saved.
