PAYMENT

💵 Cash	pending
💳 Card	paid
📱 Wallet	paid

details checked, never saved

SAVED IN ONE GO

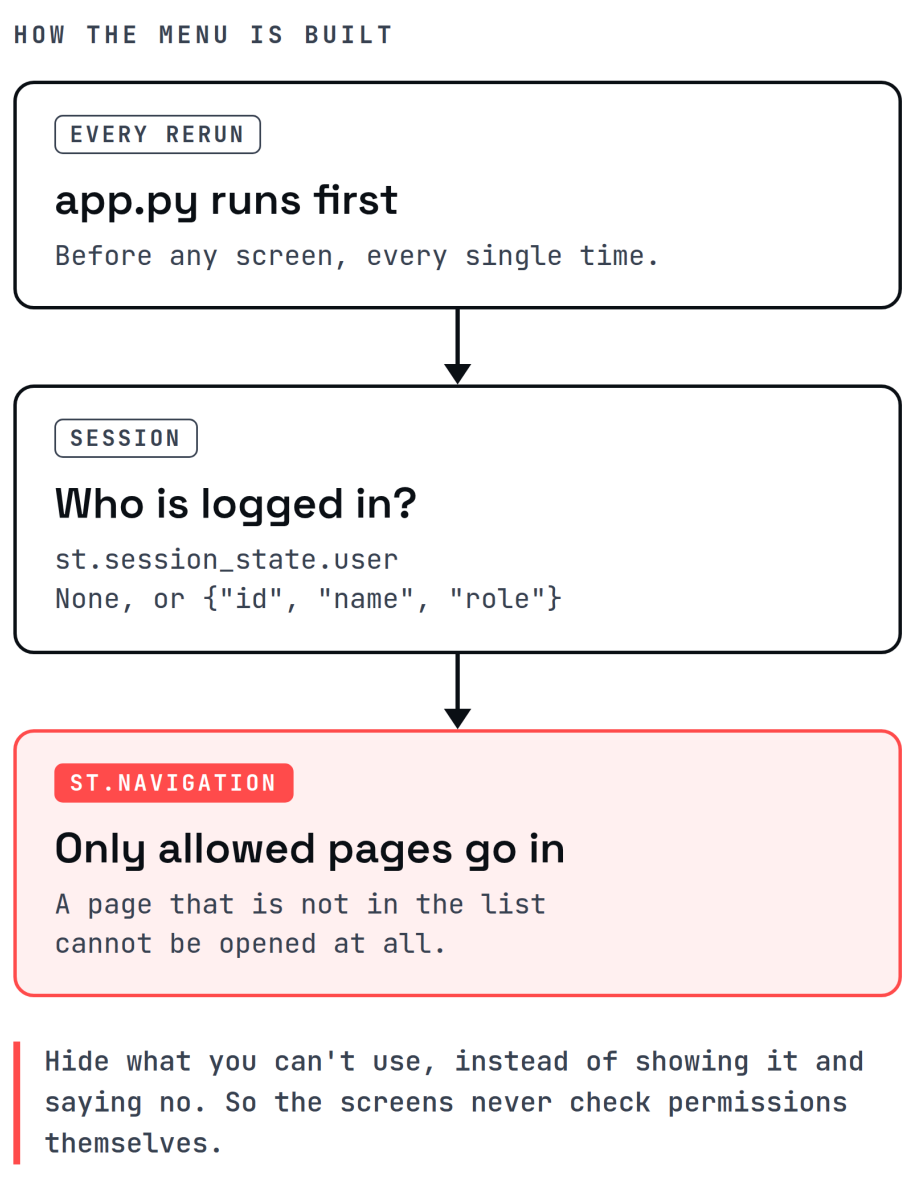
1 the address	user_addresses
2 the order	orders
3 each dish in it	order_items
4 the payment	payments
5 take dishes out of stock	products.stock

The customer sees the newest status on their "My orders" page.

An owner or admin moves each order on "Manage orders". The arrows are the normal path, but the dropdown allows any of the four.

WHO SEES WHICH PAGE

HOW THE MENU IS BUILT



app.py runs first
Before any screen, every single time.

Who is logged in?
`st.session_state.user`
`None, or {"id", "name", "role"}`

Only allowed pages go in
A page that is not in the list cannot be opened at all.

Hide what you can't use, instead of showing it and saying no. So the screens never check permissions themselves.
